ANNOUNCEMENT

Short Course VII on Surface Exploration for Geothermal Resources

United Nations University Geothermal Training Programme (UNU-GTP) in Iceland and La Geo S.A. de C.V. (LaGeo) in El Salvador will be hosting a "Short Course on Surface Exploration for Geothermal Resources", to be held in El Salvador during March 14-22, 2015. The course is tentatively planned as a one week course with lectures, field work, practical exercises, assignments and project team work.

Preliminary programme outline:

- | | |
|---------------------------------------|--|
| Saturday 14 March | - Arrival in El Salvador, Registering into a Hotel. |
| Sunday 15 March | - Opening Ceremony. Geothermal Development in Latin America and the Caribbean. Introduction to Geothermal Surface Exploration. |
| Monday 16 March to
Friday 20 March | - Participants work through the week in one of three groups: geology, chemistry of thermal fluids or geophysics. Theoretical lectures, assignments, field work, software exercises, processing, analysis and interpretation. |
| Saturday 21 March | - Presentations of findings. Conceptual models. Summary and Closing Ceremony. |
| Sunday 22 March | - Departure for Home. |

Participation in the course is by invitation only. The short course is mainly aimed at professionals from Latin America and the Caribbean area who hold a diploma or a degree in chemistry, earth sciences, physics, or engineering, who have been actively involved in geothermal development in their home country, or are potential candidates for that in the near future. Participation of women is encouraged. Organization is in the hands of:

Ingimar G. Haraldsson, Deputy Director, UNU-GTP (ingimar.haraldsson@os.is)
Evelyn de Velis, Human Resources Manager, LaGeo (evelis@lageo.com.sv)

Please contact one of them for further information.
